DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 4 and 19-25 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 19-21, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Deagan (5,566,398).

With respect to claims 4 and 19, Deagan discloses a changing aid, as shown in figure 4, comprising a mat 24 and an effect generating mechanism 40 joined to the mat 24. The effect generating mechanism 40 comprises an air jet. When the effect generating mechanism 40 is activated, it moves an article 12 that is worn externally on a body of a wearer, thereby transforming the article, to assist in the removal of the article 12, as shown in figures 1 and 2.

With respect to claims 20 and 21, the effect generating mechanism 40 causes the expansion of the mat 24 which reduces the interior size of the article 12, as shown in figure 2, and therefore changes a material property of the article.

With respect to claim 24, the change to the article is temporary.

Claims 4, 19, and 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Malick (4,015,296).

With respect to claims 4 and 19, Malick discloses a changing aid 20, as shown in figure 2, comprising a mat and an effect generating mechanism, the effect generating mechanism being magnetic. The effect generating mechanism move and transforms a portion 18 of an article 12 from a first condition to a second condition during application or removal of the article.

With respect to claim 22, the effect generating mechanism produces a magnetic field.

With respect to claims 23 and 25, the effect generating mechanism connects a first portion of the article to a second portion, thus activating or deactivating adhesion between the portions.

With respect to claim 24, the change to the article is temporary.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
